

a: ANKYRA (2.2) against its reduced versions (shaded: test sets; filled: test sets, F0, F1 and 1.x lack the within-day anchoring; the micro-load rule acts on BDG2 only and was written after its result was seen; the short-gap rule changes only windows with gaps before the origin.
b, d: the daily-mean handover, unchanged since 1.x, on the populations scored first after it was fixed.
c: ANKYRA (2.2) and 1.x against TimesFM by forecast week on the same populations.

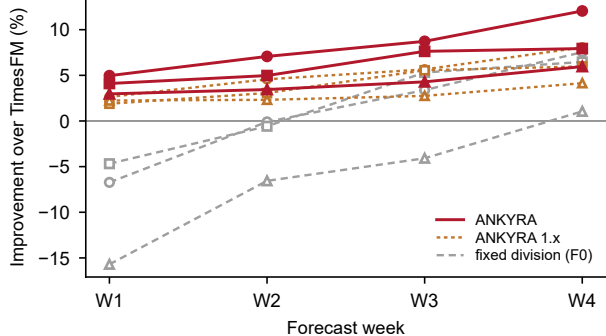

a Ablation

b Weekly per-unit weights against simpler mixing

c Lead-week profile vs TimesFM

d Estimated handover
