

a: ANKYRA 2.1 with Chronos-2 or TimesFM supplying the foundation forecasts, nothing re-selected; ten populations, all windows (re-evaluation).
b, c: the one scoring of ANKYRA 2.0.1, frozen, on HKUST campus incomer meters never read before (134 windows, 30 effective units). 95% unit-and-month intervals; filled = excludes zero; diamonds = borderline (the interval ends at zero and the reading changes with the bootstrap seed). Ridge: 123 windows. The two -X models were added afterwards.

a Anchoring gain with either foundation model

● Chronos-2 anchored vs Chronos-2
● TimesFM anchored (ANKYRA) vs TimesFM

b HKUST: hourly error

c HKUST: monthly energy error
