

HKUST campus incomer meters: ANKYRA 2.0.1 frozen before the population was read; the baselines were added afterwards against those forecasts. 14 forecasters on the 123 windows where the per-unit ridge is defined; geometric means over 29 units, the definitions of figures 9 and 9b. Readings are quantised at 10 or 100 kWh on many meters, which flattens the hourly curves. One population, kept outside the ten-population figures.

— ANKYRA - - - Chronos-2 - - - TimesFM-X — the other 8 baselines
— TimesFM 2.5 — Chronos-2-X — Per-unit ridge
