

Prediction intervals on the ten scored populations (all windows; test populations). The ANKYRA interval adds pooled residual quantiles of the unit's pseudo-forecasts to the ANKYRA trajectory. Each line in b and c is one population; the dashed line is the nominal level. Computed after scoring, as a description.

● ANKYRA interval ■ Chronos-2 native ▲ TimesFM native 0.1–0.9

a Coverage, all hours

b ANKYRA: coverage by forecast week

c Native quantiles by forecast week
